Mr. Lake and Post:

5855 '99 JUL 21 11:21

I strenuously object to the US participation in the current CODEX food labeling campaign.

I feel that the US population has a right to know if the food they are buying has been produced using genetic engineering of any sort or contains bovine growth hormone.

The US Public has the right to know. We should have a choice and not have these decisions made for us behind closed doors.

I am especially concerned because there have been no long term studies proving (or disproving) the safety of either genetically engineered food or bovine growth hormone, or the effects of each on human health.

We, the public, deserve full knowledge of the source and content of the foods we eat. Please do not take away that choice from us.
